Discovering Canadian Gold

OVERVIEW

Alto Ventures is a gold exploration company focused on properties in the Canadian Shield. The company strategy is to develop early and mid stage projects that have the potential to maximize the opportunities associated with initial discovery.

INVESTMENT HIGHLIGHTS

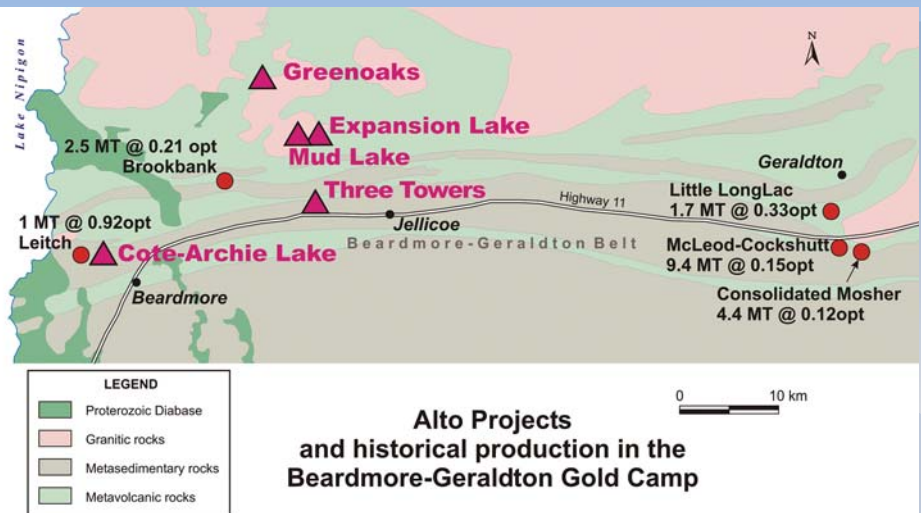

- Phase I, 5,000 m Drill Program at Destiny completed. Results Pending
- Phase II at Destiny planned
- In- II and Step-out drilling at Destiny to upgrade and expand the known resource
- Drill Program at Vassal, Quebec - January 2010
- 43-101 report at Destiny and excellent potential to expand
- Two new Joint ventures completed in 2009 on the Destiny Gold Project and Coldstream
- Focused in the Beardmore Gold Belt and at Coldstream and Destiny
- Experienced management
- Six projects in Beardmore
- Excellent infrastructure and access
- Anchored in Canada

Beardmore Geraldton Gold Belt – Ontario

HISTORICAL PRODUCTION EXCEEDED 4.1 MILLION OUNCES GOLD – FIVE PROJECTS

MUD LAKE

- 12 surface gold showings along a 6 km shear zone
- 2008 airborne geophysics delineated several new targets including Oliver Severn, where values of 13.9 g/t gold across 1.0 meters, were intersected

COTE ARCHIE LAKE

- On strike with the historic Leitch Mine (past production 860,000 ounces of gold at 0.92oz/ton)
- Up to 27 g/t gold at the Cote showing
- Joint Venture with Kodiak Exploration
- 2008 drilling intersected gold in 8 of 12 holes

EXPANSION LAKE

- New project, 100% Alto
- Initial exploration indicates strong gold enrichment (up to 745 ppb/1m)
- Up to 29 g/t silver in grab samples

GREEN OAKS

- 100% Alto
- 2008 exploration confirmed gold-quartz veins that extend over 500 m, surface channel samples returned 34.1 g/t across 1 metre

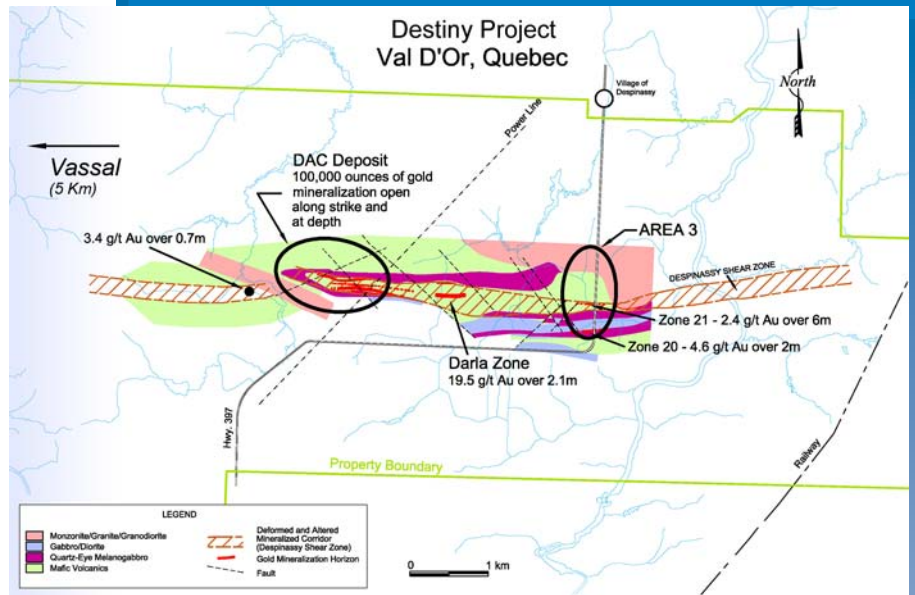

THREE TOWERS

- 100% Alto
- Golden Link mineralization trenched for 500 m with assays up to 15.5 g/t gold
- Phase 1 drilling confirmed gold to 100m depth at Golden Link including 2.4 g/t across 1.1 m

Destiny - Quebec

Phase II Drilling Being Planned

- Phase I Drilling completed
- Entered into an Option Agreement to explore the Destiny Gold Project, Québec, with Pacific Northwest Capital
- Located in the Abitibi Greenstone Belt along a major gold-bearing shear zone that extends for a minimum 6 km
- NI 43-101 compliant indicated resource of 166,863 tonnes grading 6.88 grams per tonne (g/t) gold and an inferred resource of 444,753 tonnes grading 4.46 g/t gold
- Open along strike and at depth
- Darla Zone discovered 1 km east of the DAC* Deposit, 19.5 g/t gold across 2.1m
- Drill-hole cross sections and a 3D model of the deposit can be viewed at: www.corebox.net

Vassal - Quebec

- 100% Owned
- 10 Hole Drill Program - late January 2010
- Laronde (Agnico-Eagle) style targets

* Independent evaluation by HCG Ltd.
Classified under National Instrument 43-101 guidelines

Coldstream - Ontario

- Diamond drilling planned in 2010
- Mineralized structure traced for 10 km
- Entered into an option with Foundation Resources - \$3 million over 4 years to earn 60%
- Historical Resource of 5.1 million tonnes grading 1.4 g/t gold
- New style of mineralization consistent with Iron-Oxide-Copper-Gold (IOCG) type deposits recognized on the property
